\$150 (Includes morning & afternoon tea
and course handouts)

VENUE

Palais Theatre
Centre of Franklin, 30mins south of
Hobart in the Huon Valley

Learn the basic principles of Permaculture during a practical hands-on weekend course. This short course will teach you various design techniques that you can apply to any environment, and help lead you toward a more sustainable, enjoyable, responsible and healthy lifestyle. Topics covered include composting, garden design and organic food production.

Permaculture is a design science which promotes environmentally responsible land use, appropriate technologies for industry and human settlement and the development of healthy and self-reliant communities that will flourish long past the peak oil and financial crisis.

“Though the problems of the world are increasingly complex, the solutions remain embarrassingly simple.” Bill Mollison
